

XM Radio is the best thing to come around in years!! The traffic and weather channels are great. Constantly updated with accurate info that you cannot get from FM. I pay for this service so the NAB should not have a horse in the race regarding what they have on air! Please reject the petition 04-160. They are just mad because XM is so far ahead of FM and it sounds so much better. XM is awesome and the variety is like no other. I can't live without my XM!!!
